***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 53-70 are found to be in condition for allowance.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a recording apparatus for recording moving picture data comprising a designation information supplying means for supplying information designating a decoding starting picture and a displaying starting picture in a moving picture data for each of a plurality of programs, and for supplying information designating a decoding terminating picture and a display terminating picture in the moving picture data for each of a plurality of programs, recording the moving picture data encoded by the encoding means and the designating information supplied by the designation information supplying means, wherein an additional recording can be designated by the information supplied by the designation information supplying means responsive to a user input.

Art Unit: 2613

It is noted that the closest prior art of record Kashiwagi et al. (US 6,907,190) teaches a similar recording apparatus, however, Kashiwagi fails to particularly teach or suggest *“means for supplying information designating a decoding starting picture and a displaying starting picture in a moving picture data for each of a plurality of programs, and for supplying information designating a decoding terminating picture and a display terminating picture in the moving picture data for each of a plurality of programs, recording the moving picture data encoded by the encoding means and the designating information supplied by the designation information supplying means, wherein an additional recording can be designated by the information supplied by the designation information supplying means responsive to a user input.”* as specified in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
